Brgy. Rizal, Taguig City|Portfolio|github.com/welwelg | linkedin/in/rogelio-gallardo

Passionate and driven BSIT graduate majoring in Web Development, with a strong foundation in tech, a willingness to learn, and a proactive mindset. Adept at both independent work and team collaboration, with a flexible and adaptable approach to dynamic environments. Eager to contribute to innovative projects, grow professionally, and thrive in a company that values continuous learning and teamwork.

WORK EXPERIENCE

National Telecommunications Commission	February 17, 2025 - May 29, 2025
IT Support - Internship	Quezon City, PH

- I collect, organize, and archive scam-related data, private information, and other digital evidence for secure documentation.
- I prepare and submit detailed reports of scam incidents and privacy violations to the National Telecommunications Commission (NTC).
- I provide IT support and coordinate with teams to ensure accurate data handling and timely reporting of cases.

Department of Agriculture	February 2020
Technical Assistant Trainee	Quezon City, PH

- Worked as an Immersion Trainee
- Encode several company data
- Worked with office management in utilizing Microsoft Office Applications

EDUCATION

Cagayan State University	July 2025
BS Information Technology Major in Web Development	Aparri, Cagayan

St. Augustine College	2018 - 2020
TVL - Information and Communication Technology	Quezon City, PH

PROJECTS

Barangay Management System (August 2025)
- Built a **full-stack Barangay Management System** with **role-based access control** (Superadmin, Admin, Resident) using **Laravel 12, React.js, and Inertia.js**.
- Developed a **real-time messaging feature** using **Laravel Event Broadcasting and Pusher (Laravel Echo + pusher-js)** for instant communication between admins and residents.
- Added **toast notifications** to instantly alert users for new messages and updates.

- Created modules for **resident management, announcements, complaints tracking, and disaster reporting**, improving community transparency, and response efficiency.
- Integrated **Laravel Excel (Import/Export)** for seamless resident data management and record handling.
- Implemented dynamic secure permissions using **Spatie Laravel Permission** and designed a modern interface using **ShadCN UI + TailwindCSS**.
- Added **Second Verification Code** (2-Step Verification) to enhance authentication security.
- **Integrated a Typhoon Monitoring** using:
  - **OpenWeatherMap API** for real-time typhoon and weather data
  - **Windy API/Map visualization** for animated storm tracking over the Philippines
  - Custom map utilities for dynamic geo-mapping of typhoon paths

Coffee Menu App (July 2025)
- Built a **Single Page Application (SPA)** with full CRUD functionality using React and Laravel.
- Created and maintained **RESTful APIs** for communication between frontend and backend systems.
- Designed a responsive UI with **TailwindCSS** and **ShadCN UI**.
- **Tech Stack:** Laravel 12, React.js, Inertia.js, SQLite, TailwindCSS.

Cashless Transaction using RFID in Point of Sale (POS) (August 2024 - January 2025)
- A Capstone Project
- Developed an interactive **RFID-based Cashless Transaction** system for Point of Sale to enhance customer experience by minimizing wait times, streamlining the checkout process, and promoting efficient, cashless transactions for both consumers and business owners, exclusive to the University.
- Worked as a **Backend Website Developer** of the team
- Utilized Tech Stack: **HTML, CSS, JS, Laravel 9, PHP,** and **MySQL, XAMPP**.
